Introducing our specially crafted Jackknife Allen Set for you. This set includes 2, 2.5, 3, 4, 5, and 6mm Allen keys, along with a flat screwdriver bit and a Cross lock crushing bit. Elevate your toolkit with precision and convenience.

JAS-08

THUMB TURN LOCK PICK

Quality steel tool designed for easy opening of German-type thumb-turn locks. Ensure the notched part is facing up, and gently move it back through the lock hole like a key. With its key-like design and lightweight build, it's easily portable in your pocket or toolbox. It is an ideal companion for any locksmith.

MKM-02

STAINLESS DOOR OPENER WIZARDS

Tool with a robust stainless steel construction that combines durability with thin flexibility. Its various color handle grip adds a touch of practicality and style. This wizard is crafted for the safe and non-destructive opening the door by reaching and manipulating the door latch. The plastic handle with 0.20 mm and 0.15 mm thick stainless steel ensure both comfort and strength, **with the metal part specially processed for locksmiths' safety, preventing any risk of cuts to the hands.** Unlock doors with ease and confidence using this expertly designed tool.

STAINLESS REVERSE-DOOR RELEASE WIZARD

Expert tool for safely and non-destructively opening outward opening doors like fire doors, emergency exits, and security doors. Crafted with a black plastic handle and a 0.20 mm thick stainless steel part, it ensures both durability and locksmith safety with a special processing technique to prevent hand cuts. Open doors with confidence using this successful and specially designed tool.

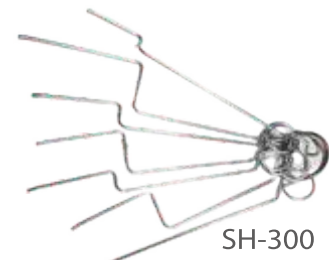

FLEXIBLE MICA WIZARD CARD – 5 PCS

The purpose of this plastic door opening device is to safely and effectively open doors without causing any damage. Made from high-quality plastic measuring 0.35 mm in thickness, this product is a valuable tool that locksmiths carry with them at all times.

LATCH OPENING NEEDLES

Quick and easy solution for opening doors with forgotten keys inside. The $\varnothing 15$ mm wires, available in four shapes, effortlessly maneuver to release the latch without causing damage. Simply choose the right model, insert horizontally, lift upwards, and intervene with the latch. Unlock doors effortlessly and damage-free.

DOUBLE SIDED LOCK PICK

A handy tool for quick and easy opening of employee cabinets and filing cabinets and small locks. It feels like having a second key, effortlessly working with both single and double-sided wafer style cabinets and cam locks. Crafted from highly flexible and hardened stainless steel, it's compact and practical, making unlocking a breeze.

JIGGLER PICK BUNDLE

The Pick Bundle is highly effective in opening various types of locks, including drawers, knob locks, and some padlocks. In addition to pantograph type auto locks, it can also work on all car locks. This versatile tool can be used both to lock and unlock locks. A must-have for locksmiths, this pick set is made of stainless steel and is specially treated to prevent any harm to the user's fingers. Not only is it functional, but it also has a stylish appearance.

A collection of Master brand tools and hardware, including a red and white tool kit, various sockets, wrenches, screwdrivers, and fasteners, arranged on a dark background. The tools are neatly organized, showcasing a variety of sizes and types of equipment.

PROFESSIONAL CRUSHER AND PULLER FULL SET

Comprehensive collection of specially designed tools in a stylish bag. This set includes:

Cylinder Crusher (KIR-35L): Super light tool with a durable aluminum handle, providing convenience during transport. The head is made of hardened steel, featuring specially designed channels to prevent roller scraping.

Round Breaker (BK-40L): Easily break tubular cylinders with this tool. It tightly grasps and breaks the cylinder in a few moves.

Cylinder Crusher and Tube Puller (KIR-35X): Combining the functions of tools for cylinder crushing and tube pulling in a single body.

Hole Guard Crusher (FF-04): Specifically designed to break the key hole guard of steel badges which made out of steel.

Rosette Crusher (RKP-3): Designed to break steel badges, made of special steel for lightweight convenience. Grasps the ruffle slot in the rosette and easily breaks the steel badge. Elevate your lock smithing with this versatile and convenient set.

5-IN-1

MASTER SCREW CLAMP

Specially designed product featuring hexagonal corners for drill compatibility and a high-gravity metal magnet for secure screw holding. It facilitates the application of the puller screw to the lock core at almost a 90-degree angle.

MPK-501

EASY SCREW MAKER

This tool is a crucial auxiliary device for cylinder pulling tools, particularly for pulling screws No-1 to cylinder cores. It streamlines and controls the screwing process, preventing the screw from sliding to the side and ensuring a more forceful and smooth application of the puller screw. Pouch for tidy storage. For pulling screws No-2 to cylinder cores, the clamp securely holds the screw head inside the apparatus, preventing slip with star drill bits. This design protects the screw head and drill bit, enabling a stronger and smoother application of the puller screw. Unlock with precision and ease using this essential tool.

MSH-11

MSH-12

TUBE PULLER & CYLINDER CRUSHER SET

Tube Puller & Cylinder Crusher Set with ease:
 Patented combo of cylinder cracker & tube extractor.
 No need for separate tools. Saves time, enhances efficiency.

1. Mount thin screw (No-1, Blue) to create keyway hole.
2. Widen hole with middle screw (No-2, Gold).
3. Insert thick screw (No-3, Titan) into the lock core.
4. Place outer part of screw no.3 into KIR-35X's inner mechanism.
5. Insert screw no.3 into lock core, reset gap with rotary knob.
6. Turn inner mechanism, pull out lock core-pins break easily. Open door with screwdriver through the empty lock core. Unlocking doors made easy (Follow steps until 6.)
7. Turn KIR-35X inner mechanism using allen key. Ensure KIR-35X is sufficiently pulled from the lock core.
8. Secure cylinder by tightening side screw with allen key.
9. Break the cylinder by turning product handle, stretching up, down, right, left. Utilize cam turner to turning device to open locked door from inside.

POWER CRACKER SET

Experience the following features:
 Super Light Cylinder Cracker/Snapper by Master Pick, crafted from a lightly hardened aluminum alloy for exceptional durability. Its ribbed inner profile ensures a secure grip during use. The tool comes with a 6mm Allen key for easy adjustments.

- Extra-light design
- Comes in a protective and hard-wearing case
- Constructed with premium aluminum alloy for reliability.

TUBE PULLING SET

Locksmith's ideal solution for efficiently and harmlessly removing various lock cores, including German, round, and oval types. This specialized tool ensures quick door opening without damage to the door or its body. By utilizing this tool, locksmiths can easily access and remove lock cores, providing a swift solution for emergency situations. The set includes special screws marked with screwing sizes, ensuring a damage-free process when pulling the lock tube. This versatile tool is effective on steel, wooden, aluminum, or plastic doors and works seamlessly with dimple locks, German cylinders, or half cylinders. The device employs a center oriented pulling mechanism with lateral support during tube pulling, offering stability and precision. Specially produced steel pulling screws prevent bending or breaking, making it a reliable choice for locksmiths in various scenarios.

MINI TUBE EXTRACT SET

Compact and lightweight tool revolutionizing lock core removal for escutcheon doors. Ideal for locksmiths, it effortlessly opens various locks, including German, round, and oval types. Unlike its counterparts, this tool is palmsized, ensuring portability without weighing down your toolkit. Specially reinforced screws guaran-tee effective and damage-free operations, making it the go-to choice for emergency lock openings. Unlock doors swiftly with-out harm, and experience 100% satisfaction with this powerful and convenient tube pulling tool.

TRIO CRACKER SET

Trio of specialized tools including the Cylinder Crusher (KIR-35L), Round Breaker (BK-40L), and Rozette Breaker (RKP-3). Crafted with special alloyed aluminum handles by Master Technic, these tools are lightweight and easily portable. The set includes a 6L Allen key for versatile use.

KEY GUARD CRUSHER SET

Patented tool designed to break the protective key hole guards on steel badges. Crafted from solid steel, this product comes in various sizes, allowing you to easily break key hole guards and interfere with the lock core and steel rosette. Its robust design ensures the ability to break the steel badge while targeting key hole guards, making it an essential tool for locksmiths.

ROSETTE CRUSHER SET

Highly practical tool designed for efficiently breaking steel rosettes. This tool securely attaches to badges, creating a unified structure, making it easier to break the screws in just a few moves. The adjustment disk is very important to engage the cracker to the badges. The set includes a 6L allen key for added convenience.

GUARD CRUSH TRIO CRACKER SET

Super Light and Durable! Includes Cylinder Crusher (KIR-35L), Hole Guard Crusher (FF-04), and Rosette Cracker (RKP-3). Features an aluminum handle for easy carrying. Set also includes a 6L allen key. Crafted from hardened steel for superior strength.

ROSETTE & HOLE GUARD CRACKER SET

Lightweight Cracker Set! Features Rosette Cracker (RKP-3) and Key Hole Guard Crusher (FF-04) with four bits. Aluminum handle for portability, includes a 6L allen key. Crafted from hardened steel for superior strength.

RKP-3F

LIGHT CROSS (STAR) CRACKER

This manual tool is specially designed to crush or break Cross (Star) Lock cylinders in case of a lost or defective key. It comes with one Cracker Bit (FMK-02) that attaches to the tool's tip. Simply place it on the Cross Lock, and with the help of the tool, swiftly turn the cross cylinder to the right and left to break it.

FMK

CROSS (STAR) CRACKER BIT

This Cracker Bit is designed for Cross (Star) Cracker, compatible with both Dimple Lock ElectroPickGuns and Manual Cross Locks Cracker. A highly practical tool for efficiently cracking cross (star) locks. Simply attach the tool to the drill or manual cracker, work it on the cross lock with gentle movements to the right and left until the lock breaks.

FMK-02

DUAL SNAPPER SET

Super Light Double Cracker Set, featuring the Cylinder Crusher and Round Breaker tools. The set includes a lightweight and versatile aluminum handle that can be effortlessly used with both tools provided in the kit.

2-IN-1

▶▶▶▶ OVAL CRACKER SET

Precision-engineered tool with a hardened steel body and an aluminum alloy handle for durability and lightweight elegance. The ribbed inner profile ensures a secure grip at just 2 mm, enabling efficient breaking operations. Positioned strategically to grip the entire cylinder circumference, the tool, tightened with a 6L allen key, uses a collet system for an unparalleled hold. The 6 mm allen key provided ensures precise operation. Elevate your breaking experience with our cutting-edge oval cylinder cracker.

▶▶▶▶ ROUND CUE CRUSHER SET ø22-32 mm (0,87"-1,25")

Introducing the "RoundCue Breaker Set" designed for ø22 to ø32 mm cylinders. Featuring specialized pins for precise impact, this set simplifies breaking cylinders (0.87"-1.25"). Drill into the cue, insert the pins, and shake left and right for efficient breaking. Its unique design ensures stability during screwing and, with cue-pinned backs, guarantees completion even if a cue pin breaks. Unlock round barrel locks effortlessly and confidently with this versatile and reliable set.

▶▶▶▶ DUO ROUND CRACKER SET ø24 & ø26 mm (0,95" & 1")

Single tool designed to break round cylinders of varying sizes. One end caters to ø25 mm – ø26 mm (up to 1") cylinders, while the other side handles ø24 mm – ø25 mm (up to 0,95") cylinders. The head, crafted from hardened steel, ensures durability, while the super-light hardened aluminum handle not only enhances resilience but also allows compatibility with other products. A compact solution for breaking cylinders efficiently and effectively.

▶▶▶▶ ROUND CRACKER SET - ø26 mm (1")

Introducing our sleek cylinder cracker, tailored for ø26 mm (1") locks. Crafted from super-light hardened steel and aluminum alloy, it combines durability with ease of use. The ribbed inner profile ensures a secure grip at just 2 mm (0.07"), allowing for a successful breaking process. Positioned to grip the entire circumference of the cylinder, the tool's side screw tightens with a 6L allen key, utilizing a collet system for a firm hold. The cylinder easily separates with right and left turns, and unlocking is a breeze with a flat screwdriver. Your tool kit comes complete with a 6 mm allen key for seamless operation. Unlock with confidence and efficiency.

▶▶▶▶ ROUND CRACKER SET - ø22 mm (0,87")

Introducing our specialized cylinder cracker designed for ø22 mm (0.87") locks. This super-light tool is expertly crafted from hardened aluminum alloy, offering both durability and ease of use. The ribbed inner profile ensures a secure grip, even at just 2 mm, allowing for a successful and efficient breaking process. Unlock with confidence using our lightweight and reliable cylinder cracker.

▶▶▶▶ ROUND CRACKER SET - ø28 mm (1,1")

Designed cylinder cracker for ø28 mm (1.1") locks. Crafted with a super-light yet durable composition, the tool features a hardened steel body and a handle made from hardened aluminum alloy. The ribbed inner profile ensures a secure grip, even at a mere 2 mm distance, facilitating a successful breaking process with confidence and ease. Elevate your lock-breaking experience with our reliable and lightweight cylinder cracker.

BK-28

▶▶▶▶ ROUND CRACKER SET – ø32 mm (1,25")

Specialized cylinder cracker designed for locks with a diameter of ø32 mm (1.25"). Crafted with precision, this super-light tool is constructed from hardened aluminum alloy, ensuring durability and ease of use. The ribbed inner profile facilitates easy gripping, providing a secure hold even at a short distance of 2 mm. Experience successful breaking processes with confidence using our lightweight and efficient cylinder cracker.

BK-32

▶▶▶▶ PULLING SCREW NO-1 – ø4,2 mm (0,16")

Introducing Master Pick's premium cylinder puller screws-a locksmith's lifesaver. The blue screw, ø4.2 mm (0.16"), kicks off the operation, showcasing durability and color-coded convenience. Crafted from a special hardened alloy metal, this self-drilling screw ensures robustness and success in cylinder pulls. For optimal results, some locksmiths use the no-3 screw directly after no-1 or apply no-2 first and then no-3, ideal for 4-pin and 5-pin cylinders. In 6 and 10 pin cylinders, applying screws sequentially (no. 1, then no. 2, and finally no. 3) guarantees a more successful operation, making these screws a reliable choice for repeated use. Available individually or as part of various Master Pick tool sets, these screws are an essential addition to your toolkit. Unlock success with Master Pick's color-coded screws: Blue (First to apply), Gold (Second to apply), and Titan (Last and the puller).

M-V1

▶▶▶▶ PULLING SCREW NO-2 – ø4,8 mm (0,19")

Introducing Master Pick's premium golden screw-a top-quality companion for all cylinder core puller tools. Durable and color-coded for convenience, this ø4.8 mm (0.19") screw ensures optimal performance. Elevate your locksmithing experience with the reliability and precision of Master Pick's golden screw.

M-V2

▶▶▶▶ PULLING SCREW NO-3 – ø5,8 mm (0,23")

Presenting Master Pick's top-tier titan screw-an excellent choice for various cylinder core puller tools. This high-quality screw is not only durable but also conveniently color coded, boasting a diameter of ø5.8 mm (0.23"). Enhance your locksmithing efficiency with the reliability and precision of Master Pick's titan screw.

M-V3

PLASTIC CAM TURNING KEY

Versatile tool designed for post-cylinder break lock opening. Available in yellow (conical tip) and black (straight tip), both featuring a built-in ruler.

Key Features:

- Verify broken cylinder locking mechanisms with tools like KIR-35X or KIR-35L.
- Conical tip controls spring tongues of mortise locks.
- Ideal for checking espagnolettes and window handles.
- Use the built-in ruler to determine the perfect cylinder size for doors.

BAB-17

KZ-01,02	Protective Pads

PRO-EKO

PRO SECURPICK SET

Versatile product offers a set of twelve auto picks designed for pantograph locked cars. With a specially designed screw structure, it accommodates both right and left channel locks. The picks feature a unique three-part design, allowing reversible application to both channels. The independently stretching tips provide convenient and non-damaging operation, available in four widths: 5 mm, 6 mm, 7 mm, and 7.5 mm. Compatible with both European and Asian car models.

GT-X

PRO SECURPICK w/ CAR FLIPPER GUN

The set includes versatile picks compatible with all pantograph locked cars, featuring nine auto picks in widths of 5 mm, 6 mm, 7 mm, and 7.5 mm. This set covers various Asian and European car brands. The picks, designed with a unique screw structure, can be applied to both right and left channel locks. With three parts, including a fixed middle and reversible side parts, the pick allows flexibility in channel selection. The independently stretching tips enhance ease of use during opening without damaging lock keys. Additionally, a Car Flipper Gun is included for bypassing two-turn and three-turn locks.

GT-XP

WAG SECURPICK w/ CAR FLIPPER GUN

The set includes four versatile auto picks (6 mm and 7.5 mm) compatible with all WAG group pantograph-locked cars such as Volkswagen, Volkswagen Commercial Vehicles, Škoda, Seat, Cupra, Audi, Lamborghini, Bentley, Porsche, Ducati, BMW etc. The picks have a unique screw structure for both right and left channel locks, with a flexible three-part design. Independently stretching tips enhance ease of use without damaging lock keys. The set also includes a Car Flipper Gun for bypassing two-turn and three-turn locks.

GT-22

WAG SECURPICK SET

Versatile set of four auto picks are designed for all WAG group cars equipped with high-security lock. Available in widths 6 mm and 7.5 mm, these picks offer convenient and non-damaging operation. It is compatible with various vehicle brands such as Volkswagen, Volkswagen Commercial Vehicles, Škoda, Seat, Cupra, Audi, Lamborghini, Bentley, Porsche, Ducati, BMW and more

GT-11

WAG SECURPICK GUITAR SET

The guitar-shaped picks in this collection are designed for unlocking vehicles equipped with high-security locking systems. Specifically tailored for Volkswagen, Volkswagen Commercial Vehicles, Škoda, Seat, Cupra, Audi, Lamborghini, Bentley, Porsche, Ducati, BMW, and similar models, the set includes a car tension tool. The tension tool features two pin strikers linked to a stable single body. Each pin striker operates independently, allowing precise manipulation of lock pins during use. This design ensures ease of operation without causing damage to the vehicle lock. Additionally, the tool can be removed even when the lock core is partially turned.

GT-01

WAG SECURPICK GUITAR w/ CAR FLIPPER GUN

The guitar-shaped picks in this set are expertly designed for easy unlocking vehicles equipped with high-security locking systems which included with a Car Flipper Gun and a Tension Tweezer. This set is tailored for compatibility with Volkswagen, Volkswagen Commercial Vehicles, Škoda, Seat, Cupra, Audi, Lamborghini, Bentley, Porsche, Ducati, BMW and similar models. The tool with two pin strikers connected to a robust single body, enabling independent impact on the lock pins. This thoughtful design ensures a seamless and damage-free operation on the vehicle lock. Remarkably, the guitar pick can be easily removed, even when the lock core is only halfway turned.

GT-02

CAR OPENER LASSO - SHORT

The incredibly versatile opener in this set is designed to effortlessly open door handles and safety pins by skillfully inserting it through the car's door slit. Crafted from a uniquely flexible and resilient stainless metal tube, this tool features a lasso knuckle at the end of a finely braided steel wire. Opening the lasso is as simple as connecting the handles, and to secure it, you gently separate the handles from each other. The rubber-tipped end ensures that it leaves no mark on the car's interior, and with a generous length of 100 cm (3'3"), it provides both reach and precision in any situation.

OM-50K

»»»» CAR OPENER LASSO - MEDIUM

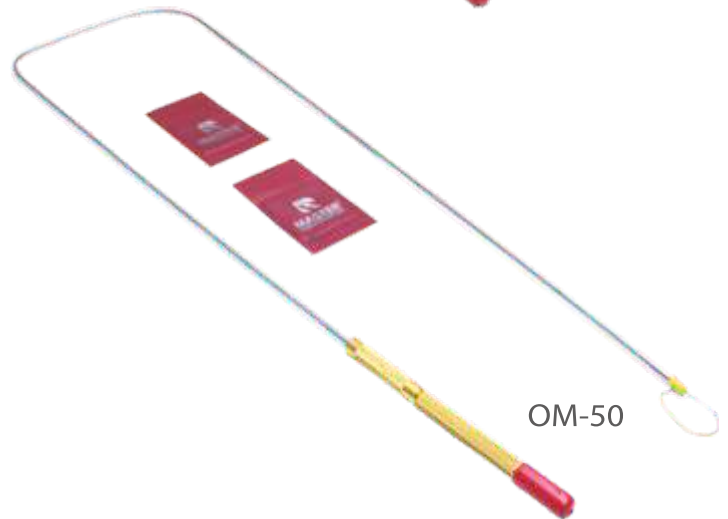

Extended model of our super-flexible lasso car opener with length of 150 cm (4'10"). This enhanced version ensures even greater reach and flexibility, providing a seamless and convenient solution for opening door handles and safety pins with finesse.

OM-50U

»»»» CAR OPENER LASSO - LONG

Extended marvel of our flexible lasso car opener, now boasting an impressive length of 195 cm (6'4"). This elongated model enhances your reach and convenience, providing an even more versatile solution for gracefully opening door handles and safety pins. It enables reaching from one car door to another from the interior.

OM-50

»»»» FLEX CAR STICK - SHORT

Crafted from flexible stainless steel and measuring 100 cm (3'3") in length, this tool is engineered for easy opening vehicle doors due to its adaptable structure. The design of the tip allows for effective intervention in car interior door handles and latches. Additionally, the inclusion of a broad aluminum handle enhances ease of use for locksmiths.

OM-60K

»»»» FLEX CAR STICK - MEDIUM

Presenting the extended version of the flexible lasso car opener, now with an impressive length of 150 cm (4'11"). This elongated model provides increased reach and versatility, offering a seamless solution for efficiently opening car doors.

OM-60

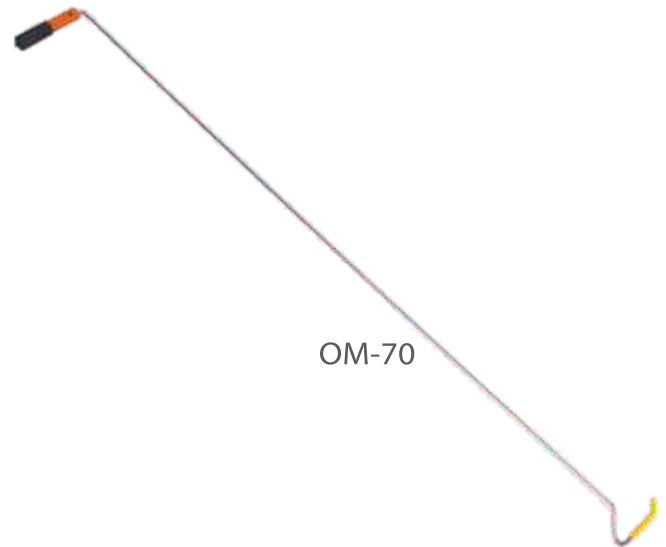

»»»» FLEX CAR STICK - LONG

Extended edition of the flexible car opener, now boasting an impressive length of 195 cm (6'4"). This elongated model enhances your reach and convenience, providing a versatile solution for effortlessly opening car doors. Elevate your unlocking capabilities with this extended reach, making it an indispensable tool that easily combines convenience with efficiency.

»»»» PVC COATED FLEX CAR STICK

Exceptionally effective in easy opening car and vehicle doors. The outer layer of the steel is coated with a 1 mm (0,04") thick soft PVC, eliminating the need for a protective plastic envelope and ensuring no damage to the door paints. Crafted from durable stainless steel with a 4 mm diameter, it spans a length of 100 cm (3'3"), providing both strength and precision in operation.

»»»» PVC COATED FLEX CAR STICK - LONG

Long Flexible Car Opener, designed specifically for easily opening vehicle doors. This highly successful product has proven its effectiveness in unlocking doors of various cars and vehicles. Crafted from durable stainless steel with a 4 mm (6/32") diameter, its outer layer is thoughtfully coated with a 1 mm (0,04") thick soft PVC. This PVC covering ensures that it operates without causing any damage to the car door during use. With a length of 135 cm (4'5"), it's perfectly tailored for the task, providing an ideal reach for the job at hand.

»»»» CAR LOCK SPINNER GUN

Designed for easily spinning a car lock, allowing you to make two or three intentional turns whether in regular or opposite direction. It works seamlessly for both right and left directions, preventing undesired locking caused by swift movements. This apparatus ensures precision by letting the pass pins stay in place while swiftly maneuvering the car spinner, eliminating any chance for the pins to shift. Experience a secure and efficient unlocking process with this thoughtfully engineered device.

CAR OPENER BARS

Despite the remarkable advancements in automotive technology in recent years, this product remains an essential tool for car lock experts, thanks to its versatility across a wide range of cars. These rods effortlessly reach the door connection points and lock mechanisms, facilitating seamless and easy door opening. The inclusion of plastic handles enhances the comfort of use, ensuring a user-friendly experience.

CAR OPENER THIN RODS

These rods, equipped with hook tips and capped with plastic at their ends, are strategically inserted into various parts of the cabin door. They securely engage with the opening mechanism on the cabin door, effectively facilitating the opening of doors. Given that some car door unlocking mechanisms operate horizontally while others function vertically, these self-opening bars/hooks success fully navigate both configurations. Crafted entirely from stainless steel, they ensure durability and reliability.

OM-11 Upward Vertical Hook

The upward-facing hook allows interference with the vertical bars inside the door, positioned behind the glass or in other protected locations.

OM-12 Backward Hook

The backward hook serves as an incredibly useful tool, designed to access connections beneath the interior door panel. It proves highly effective, especially in dealing with horizontal connections.

OM-15 Car Rod

This thin bar opener excels in rotating flexible materials and intervening in hard-to-reach mechanisms.

OM-15U Long Car Rod

Slim and elongated bar opener that excels in rotating flexible materials and intervening in hard-to-reach mechanisms.

OM-22 Wide Double "L" Rod

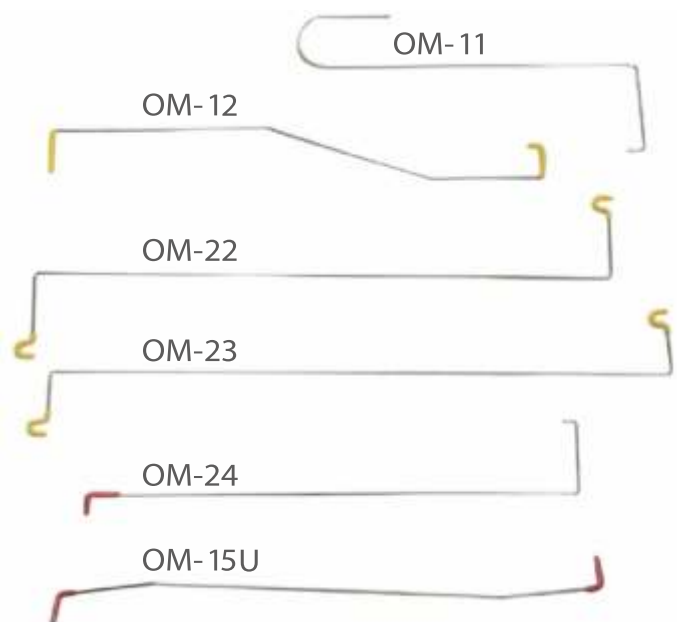

A highly practical opener, this product features a hook with one end facing up and the other facing out. It easily reaches vertical connections from both above and below. It is crafted from a special alloy for enhanced performance.

OM-23 Narrow Double "L" Rod

Designed with a hook having one end facing up and the other facing out. Ideal for reaching vertical connections from above or below, its shorter length compared to the wide double "L" opener facilitates easier intervention in close mechanisms.

OM-24 Short Rod

Similar to the thin bar opener, this tool enables the rotation of flexible materials and intervention in hard-to-reach mechanisms, providing versatility and efficiency.

ALUMINUM SLIM CAR OPENER RODS

These rods, featuring hook tips and plastic-coated ends, are skillfully inserted into various parts of the cabin door. They securely engage with the opening mechanism, effectively opening doors in both horizontal and vertical configurations.

OM-10 Vertical Hook

This vertical hook excels in opening car doors with vertical bars, strategically positioned behind the glass or in other protected locations.

OM-12U Long Backward Hook

The long backward hook is an exceptionally useful tool designed to access connections under the interior door panel. Simultaneously, it proves effective in dealing with horizontal connections.

OM-13 Long Vertical Hook

This backward hook serves as a versatile tool, designed for accessing connections under the interior door panel while also being effective in dealing with horizontal connections.

OM-24U Long Rod

This long opener rod provides intervention in challenging mechanisms with the help of its flexible and slender design. Designed with a hook having one end facing up and the other facing out. Ideal for reaching vertical connections from above or below, its shorter length compared to the wide double "L" opener facilitates easier intervention in close mechanisms.

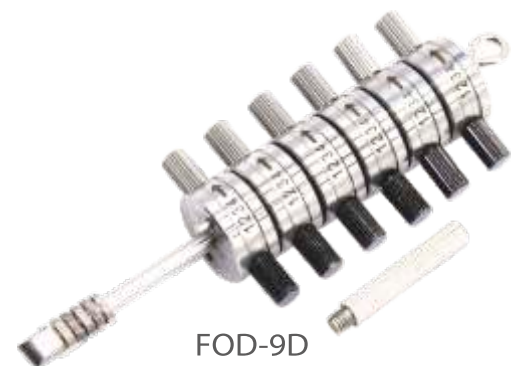

OM-24 Short Rod

Similar to the thin bar opener, this tool enables the rotation of flexible materials and intervention in hard-to-reach mechanisms, providing versatility and efficiency.

FORD TIBBE DECODER

The locking mechanisms of Ford Transit, Escort, and Jaguar vehicles differ from those of other cars. This device is specifically designed to open the doors by reading the lock codes, allowing for a straightforward unlocking process. The device directly intervenes, mimicking a key by accessing the lock through the password, enabling seamless entry into Ford, Jaguar, and similar vehicles.

FORD CAR PICK

FOD-9,9S Car Pick is a lightweight and conveniently portable lock pick crafted for the specific use on Ford Transit, Escort, and Jaguar cars, providing swift access in a professional and efficient manner.

Features:

- Directly engages with the lock
- Tailored to fit various Ford, Escort, and Jaguar vehicles

»»»» CAR TENSION TWEEZERS

Tension tweezers are a valuable addition to any locksmith's set, particularly useful when dealing with vehicle locks. Securely hold the lock open while providing tension, making them perfect for the non-destructive opening of most car locks. The jaw's tip features two differently sized notches, catering to various cylinder types. This versatile tool is handy for tasks such as reading wafers, examining keyways for stuck wafers, and removing broken keys. With a lightweight, compact, and robust design made from specially hardened steel.

Features:

- Designed for vehicle locks (non-pantograph locks).
- Acts as tension during the door opening process.
- Non-destructive tool.

»»»» LED illuminator

The LED lamp enhances visibility in low-light or tight spaces, while the suction cup ensures stability on glass surfaces, making it ideal for locksmiths and emergency responders. The combination of a powerful LED lamp and a secure attachment mechanism demonstrates a thoughtful design to enhance efficiency and precision in unlocking operations.

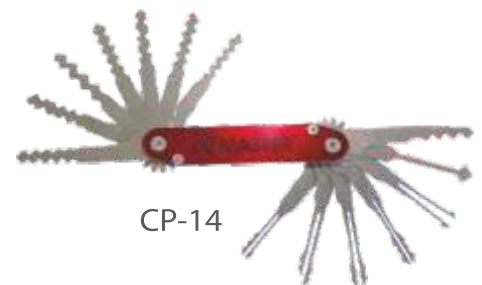

»»»» CAR LOCK CLAMP

This training clamp is designed for locksmith masters, serving as a versatile tool for training purposes. Its easy mounting on tables or counters facilitates convenient use. The assembly and disassembly processes are quick and straightforward. To ensure the protection of the workbench, soft plates have been incorporated into the connecting lower and upper jaws of the clamp, preventing any damage during assembly. Notably user-friendly, this clamp is produced as a more practical and stylish alternative to its counterparts.

»»»» CAR JACKKNIFE PICK SET

Originally created and manufactured, is compatible with all vehicles except those with pantograph locks. Its pocketknife-like design allows for easy folding of the tips, making it both stylish and portable. This popular product has been revamped to include 14 different lock picks, ensuring successful operations. Made of durable stainless steel, this lock pick is built to last. The colorful flexi material on the exterior adds a touch of luxury to the product, which is presented in an artificial leather case for sale.

»»»» AIR WEDGE

The Air Wedge is crafted to facilitate the controlled opening of car doors with minimal damage, utilizing a hand pump for inflation. Its design ensures the car doors can be opened in a controlled manner without causing harm to the door from the glass seal or the door edge. Equipped with an evacuation valve, the air can be effortlessly released. Air Wedge Dimensions: 16.5 cm (width) x 15.0 cm (height) or w6.52" x h5.90"

Features:

- Hand pump operation
- Facilitates controlled opening of car doors
- Helps prevent damage to the car during entry

“U” SHAPED AIR WEDGE

The "U Shaped" Air Wedge follows the same design principles, aiding the controlled opening of car doors with minimal damage. It employs a hand pump for inflation, and the discharge valve ensures easy air release.

HY-10U

WIDE AIR WEDGE

Similar to its counterparts, the Wide Air Wedge is designed to assist in the controlled opening of car doors with minimal damage. It utilizes a hand pump for inflation, and the discharge valve facilitates effortless air release.

HY-10W

PLASTIC CROWBAR

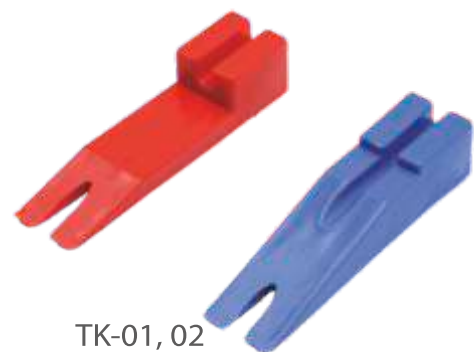

Create a space between the car door and the car body without causing harm by gently wedging a plastic crowbar. Subsequently, the car opener tool proves highly effective within this gap. Despite its lightweight design, this tool is constructed from robust and durable special plastic. Its plastic composition ensures that the door remains undamaged during the wedging process.

PL-15

PLASTIC CHOCKS

Its pointed structure allows easy attachment between the glass seal and the glass or door. It keeps the gap in the vehicle door intact until the unlocking operation is finished. The set includes one thick and one thin chock for various applications.

TK-01, 02

PROTECTIVE PADS

The Protective Pad stands as an essential tool in the field of vehicle locksmithing. Customers often desire the vehicle to remain undamaged during the unlocking process. This pad ensures that auto bars inserted through the door openings function without causing any harm to the vehicle's paint. This not only preserves the vehicle's appearance but also allows locksmiths to focus on their work without the concern of damaging the vehicle.

KZ-01

KZ-02

Safe Box Picks

SAFE BOX ELECTROPICK GUN SET

This electropick is designed for effortlessly unlocking money boxes with a rechargeable gun machine. Its double-headed feature ensures efficiency in opening boxes swinging both ways, and it excels with double-bit locks. Perfect for locksmith masters.

Note: This product is manufactured following pre-order placements.

KEM-02

SAFE BOX ELECTROPICK BLADES

Crafted for unlocking steel money boxes with double-bit locks, this tool combines the Pick and Tension tool in one durable piece of manufacturing steel. Its high-quality materials ensure longevity and effectiveness in the opening process. Locksmiths can also cut threads on the product as needed using key machines.

KEM-70, 80, 90

JACKNIFE SAFE BOX PICKS

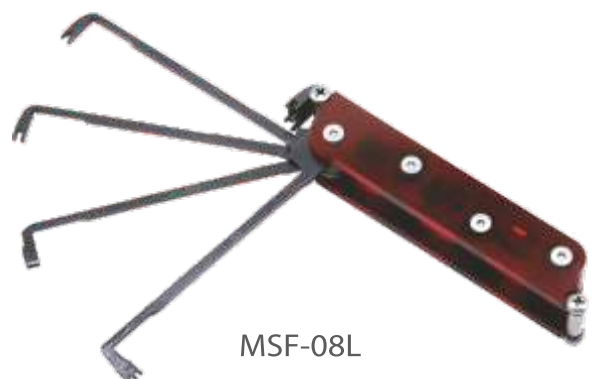

This pocketknife-style tool is versatile, serving as both an auxiliary device for safe box picks and a tension-assisted safe pick. Tailored for opening double-bit type safe boxes, its durability is guaranteed with high-quality steel. Standard-length pick tips enhance longevity, and the stylish, foldable design includes blades treated for rust resistance.

MSF-08

JACKNIFE SAFE BOX LONG PICKS

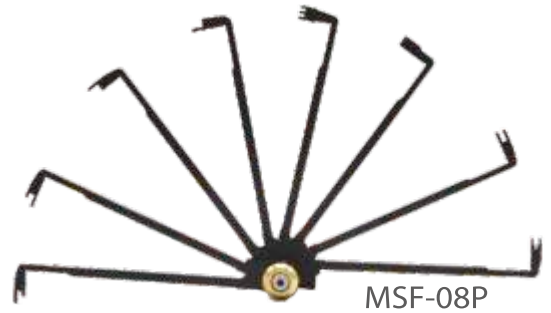

Designed as a pocketknife-style tool, this versatile accessory serves both as a safe box pick and a tension-assisted safe pick. Tailored for opening double-bit type safe boxes, it guarantees durability with high-quality steel material. With long-length pick tips, a stylish design, and foldable rust-resistant blades, it ensures lasting and effective performance.

MSF-08L

PLAIN JACKKNIFE SAFE BOX PICKS

Crafted in a pocketknife style, this tool serves as an auxiliary device for safe box picks and can function as a tensionassisted safe pick. Its durability is guaranteed by high-quality steel cons truction by a plain design. Specially treated to resist rust, ensuring longevity and reliability.

MANUAL SAFE PICK SET of SIX

This tool is specifically created to open steel money boxes and consists of two parts that lock together. It includes a manual safe pick with six distinct ends and an additional pick apparatus. Its versatility enables it to unlock both standard and levered safe locks. The combination of the pick and tension components allows locksmiths to align passwords and apply tension separately. It is made from a single piece of sturdy steel using CNC cutting benches, ensuring its durability and longevity. This comprehensive set features a selection of six distinct models of manual safe box picks, catering to various locksmithing needs.

MANUAL SAFE PICK SET of FOUR

Designed for opening steel money boxes, this tool comprises two interlocking parts - a manual safe pick with four different ends and an auxiliary pick apparatus. It's versatile, capable of unlocking standard and levered safe locks. The interplay of the pick and tension parts allows locksmiths to align passwords and apply tension independently. Crafted from a single piece of durable steel on CNC cutting benches, it ensures longevity. This set comprises four diverse models of manual safe box picks.

MANUAL SAFE PICKS

Individually available, each of these manual picks boasts a unique blade shape, providing a tailored solution for your specific needs.

Security Products

MASTER ELECTRIC STRIKE DOOR OPENER 220v

The 220-volt electric strike door opener system is designed for spring latch doors. When the automatic door buzzer is pressed, the lock latch is briefly pushed by the system and the door is opened by holding it down for 5 seconds. After 5 seconds, it disengages, ensuring the door is secure. Unlike other systems, it doesn't require a manual reset of the mainspring mechanism. If the door isn't opened within 5 seconds, it automatically closes. Proper door mechanics, correct installation, and electrical connections are essential for smooth operation, and professional installation is recommended.

BAS-220

MASTER 220v ELECTRIC STRIKE OPENER w/ 2 pcs REMOTES

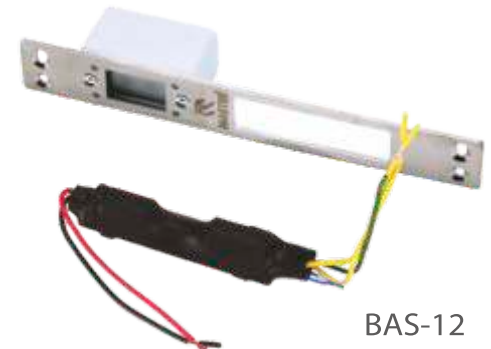

Enhancing convenience, this 220-volt model comes equipped with two remote controls, already paired seamlessly with the device.

BAS-220K

MASTER ELECTRIC STRIKE DOOR OPENER 12-24v

Designed for doors secured with a spring latch, this electric strike door opener system operates on 12 volts (compatible with up to 24 volts). Upon pressing the automatic door buzzer, it briefly extends the lock latch forward, holding it for 5 seconds to allow the door to open. After this period, it reduces the force, allowing the door tongue to retract into its slot, ensuring the safety of your door.

BAS-12

MASTER 12v ELECTRIC STRIKE OPENER w/ 2 pcs REMOTES

Enhancing convenience, this 12-volt model comes with two included remote controls, seamlessly paired with the device for effortless operation.

BAS-12K

REMOTE for BAS-12/BAS-220

Produced as a remote for BAS-12 or BAS-220 Master Strike Openers, it's compatible with all smart controllers. It must be the initial remote for pairing with Master Strike Openers; subsequent remotes won't pair.

Once paired, it can be duplicated with other smart remotes if needed.

BAS-R

MASTER PRY GUARD

The Pry Guard serves as a security measure for winged systems like doors and windows. Installation involves affixing two steel pieces to the wing and frame, effectively eliminating the risk of stretching and opening. Its drill-shaped bolt edges make it easy to install on various surfaces, including PVC, aluminum joinery, steel, and wood doors. Moreover, it prevents doors and windows from sagging over time. There are five different colors available for this product.

Colour Options

EMK-02

MASTER LATCH GUARD

Extraordinary, easy-to-install product that ensures security by preventing any unauthorized access to the door latch. It gives the illusion of a fully locked door, providing ultimate peace of mind. The combination of metal and plastic pieces intertwined upon closure creates an extra layer of security. Additionally, the self-adhesive design makes installation easy for both locksmith professionals and end-users. Notably, the product's unique feature ensures that doors equipped with it cannot be opened by any means using metal or plastic plates.

KDK-007

MASTER EXIT PRY GUARD

Highly effective solution designed for outward-opening doors, such as exit doors or fire escape doors, susceptible to break-ins. The Exit Pry Guard ensures these doors cannot be pried open with levers or metal sticks. Installation is a breeze with self-tapping screws provided, requiring no extra attention post-installation.

EMK-03

HYGIENIC TOUCH GUARD

Solution to avoid hand contact with door handles amid Covid-19 concerns. Made of high-quality aluminum, this hygienic door handle allows you to open doors effortlessly using your elbow instead of your hands. Sold in pairs for both interior and exterior handles, or available separately for convenience. Stay safe and hands-free!

HDH-01

MASTER STEEL ROZETTE w/ 6 Screws

Patented product with a unique cylinder protection method. This robust solution can be installed in just 2 minutes using the 6 smart screws included in the package. The lock cylinder, when mounted, prevents the top part from being disassembled, ensuring a strong and secure installation.

Installation:

- Screw the lower part of the Master Rosette to the door.
- Mount the cylinder on the door.
- Remove the lock from its slot before installing the top lid.
- After screwing the top lid, remount the lock cylinder, preventing disassembly.

MCR-06

NAMABLE MASTER STEEL ROZETTE

Customize with your preferred text or logo upon request. Minimum order quantity: 60 pieces.

MCR-06N

PATENTED FAYN CROSS LOCK SET

The Cross Lock is specifically made to compatible with the Master Cross-Lock Steel Rosette. It can solely be unlocked using custommade cross-lock keys, as the blank key's body is thinner than a standard crosslock key.

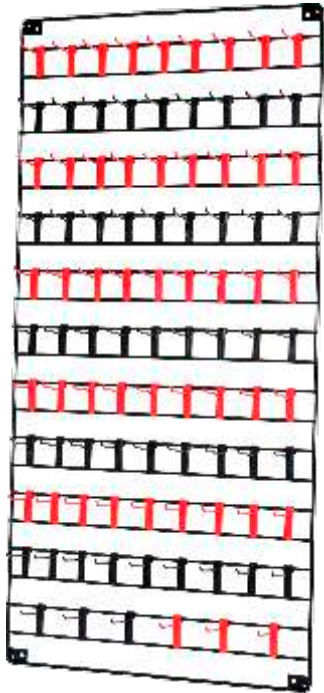

FK-L3

Tools & Machines

MASTER WALL KEY STAND

Introducing MASTER's specialized stand for locksmith shops! This modular 50 x 100 cm (1'7"x3'3") design comes with 100 plastic hangers, allowing flexible key displays. Choose from black or red options for added convenience. Say goodbye to the hassle of fixed displays and welcome a user-friendly solution for showcasing various blank keys.

MKS-100

MASTER COUNTER TOP KEY STAND

Modular product designed in 35 x 55 cm (1'2"x1'9") dimensions. This comes with 50 plastic hangers for customizable displays. Available in two colors, black and red. Designed for easy use, it offers exceptional convenience for shop owners.

MKS-50

PLASTIC HOOK FOR KEY STANDS

Crafted from durable ABS plastic, this elegant and practical product is available in black and red versions. We recommend choosing a color that complements the stands for a cohesive look.

KH-01

PATENTED FAYN BLANK KEY

This unique blank key is designed for FAYN branded star (Cross) locks. The key's body is thinner than that of regular star blank keys.

FK-BL

MICROMETER

Analog measurement is a breeze with this micrometer instrument, offering precision down to 0.01 mm. Its unique design allows for measuring pit depths, particularly useful for ball keys. The reset table measurement screen adds precision to your measurements, enhancing accuracy.

MIK-10

BATTERY POWERED CALIPPER

A must-have for locksmith masters, this digital battery-powered caliper ensures precise measurements. It offers four measuring modes for inside and outside diameter, depth, and step. With a range of 0-150 mm, 0.1 mm resolution, and ± 0.2 mm accuracy, it's perfect for differential measuring. The smart design allows easy zero setting, and the large LCD screen provides quick and accurate results. Additionally, it features auto-off for power-saving convenience.

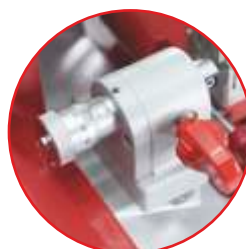

KP-10

ZAMBAK GERMAN KEY CUTTING MACHINE

MASTER Zambak CZ-12 machine will add a nice atmosphere to your work area with its ergonomic design. It is as stylish and useful as the machines produced in Europe, and since it has some extra functions, it increases working efficiency and offers great comfort to the employees. Semi-automatically duplicates German type flat keys, automobile keys, and cross lock keys of all widths and lengths in both forward and backward motions. It is enhanced by a wire brush for deburring and a grindstone for fine cut and polish. The movable rectangular LED lighting adds a special beauty to the machine. It has a high-strength aluminum body and highly calibrated tools were used in its production. It has high security equipment to prevent misuse.

CZ-12

▶▶▶▶ KURT GERMAN AUTOMATIC KEY CUTTING MACHINE

Effortlessly duplicates automobile keys, Yale type house keys, and cross lock keys with swift and consistent performance in both forward and backward motions. Its practicality is enhanced by efficient deburring with a wire brush, saving valuable time. This model ensures economic and practical results, making it user-friendly for employees without the need for specific skills.

YM-75

▶▶▶▶ KURT DIMPLE & PANTOGRAPH KEY CUTTING MACHINE

Pantograph key cutting machine ensures even and vertical cutting, featuring a micrometrically sensitive clamp and a vibration-preventing body. It facilitates easy copying of both pantograph and dimple keys without requiring clamp changes. The machine efficiently opens channels on auto keys, delivering practical and rapid results. Its sensitive pantograph tips allow detailed focus, saving time in the process. This new model guarantees excellent results economically and practically, with added convenience in processing the back (upright) parts of keys. The PN-80 machine operates with high-precision vices, a balanced body, and lighting for use in unlit environments.

PN-80

▶▶▶▶ KURT GERMAN KEY CUTTING MACHINE

Machine operates swiftly, maintaining consistent speed in both forward and backward movements. It ensures practical and efficient results, incorporating deburring with a wire brush to save time. The machine's sensitivity leaves no room for doubt. The YM-35 model from Kurt guarantees economical and practical outcomes, making it easy for employees to learn and cut various keys without requiring specialized skills.

YM-35

▶▶▶▶ LARGE PIN SET

The set includes up to 4,200 pins in various sizes, comprising both top and bottom pins along with master pins and pin springs. Additionally, it features a Cylinder Removal Saddle for use in master pin creation.

PP-24

▶▶▶▶ PIN SET

The set contains up to 3,000 pins in various sizes with a specific diameter, including both top and bottom password pins, master pins, and pin springs. Additionally, a Cylinder Removal Saddle is included in this set.

PP-18

ZEMBIL SHARPENING MACHINE

This versatile machine is designed for sharpening various tools with different-sized discs. Ideal for cutting, chopping, drilling, and shredding, it's perfect for professionals handling frequent sharpening tasks. Well-suited for butcher knives, sheep shearing knives, and combs, it can also perform dry sharpening with ceramic sandpaper. The machine includes two spare abrasives and deburring polishes, weighing a total of 30 kg (66 lb) with twin engines (0.75 kW and 0.25 kW).

Z-4x4

ZEMBIL SHARPENING MACHINE

The go-to choice for professional sharpeners, this versatile machine accommodates various tools with different-sized disks. Compatible with disks of different ratios and widths, it can sharpen drills, cutters, and shredder tools. It's capable of dry sharpening with ceramic sandpaper and offers the option to immerse the product in water for cooling during sharpening.

Z5-60

ZEMBIL SHARPENING MACHINE

Ideal for shop owners, this tool offers dry sharpening with ceramic sandpaper and the option to immerse the tool in water for cooling during sharpening. Designed for uninterrupted work, it comes with two spare sandpapers and deburring polishes.

Z5-35

ZEMBIL SHARPENING MACHINE

Designed for individual and hobby use, this tool provides dry sharpening with ceramic sandpaper and the option to immerse the tool in water for cooling during sharpening. While ideal for personal use, it may experience performance degradation with heavy use, making it unsuitable for commercial activities. Two spare sandpapers and deburring polishes are included.

Z5-H

Spare Parts

▶▶▶▶ **MINI EXTRACT'S HEAD**

The head of the super-light Compact Tube Pulling set (HX-03) is designed for easy use. Crafted from special aluminum, it's elegant and lightweight. Paired with special pulling screws, it excels at removing lock cores. Ideal for door locks with badges, this tool is effective on profile, round, and oval lock cores without damaging doors. Suitable for Dimple or German cylinders and half cylinders, it works on steel, wood, aluminum, or plastic doors. Exceptionally useful for emergency openings.

HX-03H

▶▶▶▶ **TUBE PULLER HEAD**

The tube puller is a key tool in locksmith sets, breaking lock cores using a special screw. Specially crafted steel pulling screws accompany the lock tube puller, providing an effective solution for badges on door locks. This versatile tool works on various lock cores (profile, round, oval), ensuring easy removal without door damage. Its application extends to Dimple or German cylinders and half cylinders, suitable for steel, wood, aluminum, or plastic doors. Particularly effective in emergency lock openings, the tube puller is a go-to for locksmiths.

HX-00

▶▶▶▶ **CYLINDER CRACKER'S HEAD**

The head of the super-light Cylinder Breaker set (KIR-35L) uses a 6L hex (allen) key. Made of hardened steel, its keycylinder mouth wraps tightly around the door lock's cylinder when the side screw is tightened. Specially designed sharp channels on the inner walls allow force application without stripping the cylinder.

35L-H

▶▶▶▶ **CRACKER & PULLER'S HEAD**

The patented Dual Function Breaker, a MASTERPICK design, integrates cylinder breaking and tube pulling in one tool. This eliminates the need for locksmiths to carry separate tools for unlocking services.

35X-H

ROZETTE CRUSHER'S HEAD & DISK

The Rosette Crusher consists of two key parts: the Breaker Head and Adjustment Disc. The Adjustment Disc, with an outer layer of specialized aluminum alloy and an inner steel layer, complements the Rosette Breaker's top-quality construction. This tool, with its protective covering, grips the rosette hole's inner edges. By shaking vigorously with the Adjustment Disc, the Rosette Breaker crushes and destroys rosette screws for effortless removal.

RKP-3HD

ROZETTE CRUSHER'S DISK

The Rosette Crusher's essential ally, made with a special alloy aluminum outer and inner steel part. Designed for lightness, it aids key makers and locksmiths. Passing through the adjustment disc, it fits into the ruffle slot, fully clamping onto the door's rosette. This secure attachment is achieved through the disc's rotation and the contra-compression of the Rosette Crusher. The rotating clamping feature allows easy removal of steel rosettes from their screws.

MK-D

ROZETTE CRUSHER'S HEAD

Designed to tear off steel rosettes. It is made of special steel. The handle part and Allen key can be used together with the MK-D Rosette Crusher's Disc. In addition, since it is designed to be verylight, it provides convenience to key makers and locksmiths. It grasps the ruffle slot in the badge well. Thanks to the special counter screwing head, it is fully clamped to the rosette. Thanks to its strong gripping jaw and arms, it easily breaks the steel badge from its screws.

MK-03

ROUND CUE BREAKER'S HEAD

Specially designed to break round and triangular lock cylinders. Unlike other tools, there is a slot in the body to accommodate target shifts that may occur during drilling. The pins on the other end are designed to leave traces like the other end. æade from durable aluminum, this tool not only stands out with its elegant anodized paintwork, but also adds value to working environments.

BK-11H

KEY GUARD CRUSHER BIT

The guard crusher is a durable tool for security professionals to quickly break through shields and gain access. It is versatile, easy to use, and a must-have for emergency situations.

FIR-1

FIR-2

FIR-3

FIR-4

CRUSHER'S BUDDY DISC

Tube pulling demands precision to avoid damaging the lock, especially for high-security locks resistant to conventional picking. The Abutment Disc stabilizes the cylinder, aiding locksmiths in gently extracting the lock core. In situations where other methods fail, tube pulling stands out as a valuable technique. With the proper tools and skill, locksmiths can open even the most stubborn locks without harming the door.

DCP-01

ALUMINUM HANDLE

The handle for cylinder snappers or crushers is crafted from a durable aluminum compound, compatible with several Master Pick breakers. Its lightweight design offers ease of use.

MHN-20

ROUND BREAKER'S HEAD-26cm / 1"

Designed for $\varnothing$ 26 mm (1") round locks, this super-light cylinder cracker, crafted from hardened steel, effortlessly breaks round lock cylinders. A firm squeeze on the side screw and a vigorous shake break the cylinder easily.

BK-26H

ROUND BREAKER'S HEAD-32cm / 1 1/4"

Tailored for $\varnothing$ 32 mm (1.25") round locks, this super-light cylinder cracker, constructed from hardened steel, effortlessly breaks round lock cylinders. A robust squeeze on the side screw and a vigorous shake swiftly break the cylinder.

BK-32H

OVAL BREAKER'S HEAD

Effortlessly break round lock cylinders with this tool. Simply tighten the side screw strongly to extract it from the lock cylinder. It serves as a spare part for the OV-35 set.

OV-35H

BIT HOLDER ADAPTER

Versatile magnetic bit holder for 6 mm hexagonal drive screwdriver bits. Features a robust and corrosion-resistant stainless steel sleeve. The magnetic base and c-ring ensure a secure grip on the bit.

BTA-05

AIR WEDGE PUMP & VALVE

This is the spare pump and valve for the Air Wedge, facilitating controlled door opening without damage. The hand pump, passing through ducts or door edges, allows precise inflation and easy air discharge. The special rubber pump ensures inflation, making it durable for thousands of uses.

HY-10PV

ORION ION BATTERY-5C

The Orion 18650 Lithium Ion Battery is a rechargeable 5C battery with a voltage of 3.7 volts and a capacity of 15000 mAh. Sized at 65mm x 18mm. Unlike Ni-Cd batteries, they retain capacity after charging and don't quickly lose power. However, they can be dangerous if misused. Due to their high capacity, careful charging and handling are crucial. Avoid direct sunlight, never open them, and keep them away from children to prevent the risk of explosion or fire.

P-18650

INDUSTRIAL MINI ENGINE-4.8V

A common mini-engine widely used in hand tools, universities and industrial R&D. Size: 35.8 x 50 L, Shaft O.D. 3.175 mm. Versatile applications include vacuum cleaners, air pumps, power tools, electrical model toys, ironmongery, and industrial products. Weighs approximately 150g.

STD-M1

T WRENCH

This tool is essential for manually operating a dimple lock pick key. Before sliding in the pick key, the pick key holder must be attached to this tool, which features a hexagonal bed for holding the pick holder.

MBT-11

STANDARD KEY HOLDER (100 Pcs)

Key Holders are indispensable companions for keys, offering a practical solution for organizing multiple key sets. Choose from 10 different color options.

Packaging: 100 pcs/bag.

KA-01

ROUNDISH KEY HOLDER (100 Pcs)

Roundish key tags are vital tools for maintaining key organization, offering a practical solution with various color options for effective management.

Packaging: 100 pcs/bag.

KA-02T

HOTEL TYPE KEY HOLDER (10 Pcs)

This key holder model is suitable for hotel, motel, and hostel use. The round rubber ring prevents damage to the dropped board. The package includes 10 different colors.

Packaging: 10 pcs/bag.

OKA-10

BIG FLAP KEY HOLDER (100 Pcs)

A larger key holder for clear prints, with one side left blank for customer customization. Custom prints are done on the other side using transparent labels with reverse writing, ensuring durability. Each key holder is hand-made, ensuring a long-lasting print.

Packaging: 100 pcs/bag.

KB-07

▶▶▶▶ PLASTIC KEY RING (250 Pcs)

Compatible with most Yale-type keys, this plastic key ring offers customer convenience with various colors for easy key distinction.

Packaging: 250 pcs/bag.

AB-H

▶▶▶▶ KS PLASTIC KEY CAP (250 Pcs)

A plastic key head designed for oval-shaped keys, commonly found in dimple lock keys.

Packaging: 250 pcs/bag.

AB-KS

▶▶▶▶ PK PLASTIC KEY CAP (250 Pcs)

A plastic key head designed for square-shaped keys, commonly used in dimple lock keys.

Packaging: 250 pcs/bag.

AB-PK

▶▶▶▶ MASHROOM KEY CAP (250 Pcs)

The mushroom-shaped cap is affixed from the top of the key. To mount it, the key must be detached from the ring, offering a distinctive appearance compared to regular heads.

Packaging: 250 pcs/bag.

AB-M

▶▶▶▶ HALF MOON KEY CAP (250 Pcs)

A frequently used key head that can be attached without the need to remove the key from the ring.

Packaging: 250 pcs/bag.
